DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25 and 50-52, drawn to registering, creating and sending a multicast message for multiple destination distribution, classified in class 370, subclass 390.
 - II. Claims 26-49 and 53-55, drawn to maintaining redundancy group binding table associated in contiguous regions interconnected by a local area network, classified in class 370, subclass 338.

The above inventions are separate, distinct and independent from each other. Neither requires other for its implementation, they have separate statuses in the art as shown by their different classification. Each invention, if allowable, would be capable of supporting a separate patent. Therefore, restriction for examination purposes is proper.

2. A telephone call attempt was made to Elise Heilbrunn on 12/29/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chirag G. Shah whose telephone number is 571-272-3144. The examiner can normally be reached on M-F 8:30-5:00.
